

Professional Summary

- 8+ years of experience in qualitative and quantitative research, specializing in analyzing complex human data and developing efficient, scalable workflows.
- Multidisciplinary background combining psychology (user-centered experiment design, A/B testing, surveys) with statistical rigor and computational modeling expertise.
- Neural-AI innovator with a track record of applying advanced ML/DL models (e.g., variational autoencoders, graph neural network) to uncover causal brain-behavior relationships with clinical relevance.
- Blend a strong analytical mindset with hands-on large-scale data collection and meticulous attention to detail.

Skills

Programming Languages: Python, R/RStudio, SQL, MATLAB, Git, Github

Machine Learning: PyTorch, TensorFlow, Keras, Scikit-learn,

Bayesian Methods & Optimization: Bayesian inference, MCMC, variational inference, hierarchical modeling

Big Data & Cloud: PySpark, SparkSQL

Data Processing & Visualization: Pandas, NumPy, dplyr, ggplot2, tidyverse

Experience

Research Fellow

04/2022 – Present

National Institutes of Health - Baltimore, MD, US

- Applied **inferential statistical methods** (e.g., t-tests, ANOVA, mixed-effects models) to analyze behavioral and neuroimaging data across studies (across >500 sessions), performing **hypothesis testing** to draw group-level conclusions.
- Integrated **reinforcement learning (Q-learning)** with a **hierarchical Bayesian model** to mechanistically explain neuro-modulation outcomes and support **causal inference**, reconciling neural and behavioral data across >300 trials from 31 human participants.
- Developed **conditional variational autoencoders (VAEs)** to decode latent brain network dynamics from resting-state fMRI from more than 300 sessions, enabling measurement of neuromodulation effects that aligned with behavioral changes.
- Designed a **hybrid Autoencoder-Graph Neural Network (GNN) framework** to segment brain subregions from fMRI-derived functional connectivity, addressing the challenge of integrating global connectivity patterns with local spatial information for brain parcellation; improved clustering coherence across human participants by 17% compared to K-means baseline.
- **Automated ETL pipeline** for fMRI and behavioral datasets (~100 sessions), cutting preprocessing time from 2 hours per session to under 20 minutes and ensuring consistency across 5+ downstream analyses.

Postdoctoral Fellow

02/2021 – 03/2022

Northwestern University Feinberg School of Medicine - Chicago, IL, US

- **Initiated cutting-edge research** on frontal cortex-midbrain function, contributing novel theoretical insight with clinical relevance; results published in *Nat. Commun.* (<10% acceptance rate), presented at invited conferences, and featured by NIH media.
- Led functional MRI (fMRI) and transcranial magnetic stimulation (TMS) **experimental design** using olfactory and visual stimuli across 3 studies (~300 sessions), overseeing **survey design, UI flow, and A/B testing** to optimize participant experience; resolved technical challenges in precisely synchronizing odor delivery with MRI acquisition.
- **Managed day-to-day staff operations**, including training, task coordination, and scheduling, to ensure smooth execution of neuroimaging studies involving complex experimental protocols and multi-session data collection.
- **Mentored and supervised** research assistants and summer interns, guiding independent research projects, reviewing code and experimental scripts, and fostering strong analytical and problem-solving skills.

Education

PhD, Psychology <i>Ohio State University - Columbus, OH, US</i>	<i>08/2016 – 01/2021</i> <i>GPA: 3.9/4.0</i>
Master’s, Statistics <i>Ohio State University - Columbus, OH, US</i>	<i>08/2016 – 05/2018</i> <i>GPA: 3.7/4.0</i>
Bachelor’s, Psychology <i>Beijing Normal University, Beijing, China</i>	<i>09/2012 – 07/2016</i> <i>GPA: 4.0/4.0</i>

Certifications

- Generative AI with Large Language Models (DeepLearning.AI / AWS)
- Machine Learning Specialization (Coursera / Stanford)
- Deep Learning Specialization (Coursera / Stanford)
- SQL for Data Science (Coursera / UC-Davis)
